Overview

The NLG 101520 Ascent Pouch™ is a durable, multi purpose tool pouch designed for ropes access workers. The pouch has an ergonomic D-shaped design that provides plenty of storage space. It will keep your gear both securely stored and easily accessible when working at height. Dropped objects can cause serious injury to those around you or damage to equipment and vehicles. As such, it is vitally important to make sure your equipment is safely secured.

The Ascent Pouch™ is made from Megatex™, a highly durable material that is up to 7 times more abrasion-resistant than most premium military-grade fabrics. The pouch has a weather resistant quick-cinch closure that is easy to use, even with one hand. Four load-rated anchor points inside the pouch make it quick and easy to securely tether your tools. Maximum load of 5kg (11lbs).
