Overview

Specification

The 3M 9913 Speciality Particulate Respirator is a traditional, cup-shaped disposable respirator. Lightweight and comfortable to wear, the 9913 respirator is suitable for use in a wide variety of roles. It provides effective protection against low levels of fine dusts and oil or water-based mists. It also offers relief from nuisance levels of organic vapours.

The mask has a collapse resistant convex shape, an adjustable nose clip and twin colour-coded straps, so it offers a secure fit across a broad range of face shapes and sizes. The mask is also designed to be compatible with 3M's range of eyewear and hearing protection products.

- **FFP1** - protects against low levels of fine dusts, fumes, water and oil based mists or aerosols in concentrations of up to 4 x WEL.
- **NR** - non reusable. Disposable masks suitable for single shift use only.
- **D** - these filters have passed the Dolomite clogging test, giving the user better breathing resistance.
