Overview

Specification

The JSP FAR1101 Spartan Restraint Kit is a practical fall restraint kit designed to provide the essentials you need for working at height. Ideal for working on scaffolding, cherry pickers, roofs and more. Convenient and reliable. The Spartan Restraint Kit contains a 1-point Spartan safety harness (FAR0301) with 44mm polyester webbing (25kN breaking strength). The harness has adjustable chest and leg straps, a sub-pelvic strap, a dorsal D-ring for fall arrest, plastic strap retainers and a fall indicator for easy inspection. The metal components are made from tough alloy steel with a golden yellow finish (23kN breaking strength). Tested to EN 361:2002 European standards.

The Work Restraint Lanyard (FAR0313) is made from 12mm diameter Polyamide three strand twisted rope. Fixed length 1.8 meters with a breaking strength of 24kN. The rope ends are spliced and covered with a polyethylene protective sleeve. Abrasion-resistant thimbles are provided within loops. The lanyard has 2 screw gate connectors with a gate opening of 18mm, again in alloy steel with a golden yellow galvanised finish. Tested to EN EN 354:2010 and EN 362:2004 European standards. All of the listed components are supplied a woven and highly convenient drawstring JSP bag.
