Overview

Specification

The MSA V-Gard 500 Non Vented Safety Helmet, with its distinctive trademark 'V' design, is a world recognized brand known for comfort, quality, and durability. The V-Gard 500 is one of the most popular safety helmets on the market. MSA have been making the V-Gard hard hat range for years and they are used all over the world in a wide range of environments. For example building & construction sites, offshore, nuclear power stations and more.

The V-Gard 500 safety helmet is made from high quality ABS which gives the wearer a high level of protection. The helmet's high profile design means it can also be fitted with ear defenders; such as the 3M Peltor Optime II or 3M Peltor Optime X4P3. MSA also produce their own range of compatible ear defenders. Protective eyewear can also be worn alongside the helmet without hindering it's use. The helmet also has a rain gutter for working outdoors.

This version of the V-Gard 500 features the MSA Fas-Trac III wheel ratchet suspension - smooth rotation with reduced effort to turn, the easy grip wheel ratchet can be adjusted even with gloves on.
