Overview

Specification

The Bolle SILIUM Metal Framed Safety Glasses are sturdy, comfortable and above all effective, providing superb all-round protection. The impact resistant polycarbonate lens provides superb protection from mechanical risks and ultraviolet light. It also features Bolle's CLEAR lens coating technology - this permanent coating provides perfect optical quality while making the lens scratch-resistant and also helping to prevent fogging.

The SILIUM glasses have brass Flex 160° frames with TIPGRIP temples so they feel robust, are non-slip and provide a secure fit. The Flex 160° frames are soft and pliable, allowing you to adjust the space between the temples for a more comfortable fit. The glasses also feature an adjustable non-slip nose bridge, so they sit comfortably on the wearer's face. Tested and certified to EN 166:2001 and EN 170:2002 European standards.
