Overview

Specification

The 3M Peltor H510AK Kids Ear Defenders are lightweight, comfortable earmuffs created especially for use by children. They are probably the best children's ear defender on the market and are perfect for noisy activities like firework displays, concerts, motor shows etc. It's never too early to introduce your kids to health and safety, and the 3M Peltor Kids Ear Defenders are a perfect way to do so.

Children's hearing is extremely sensitive, and they have very little protection against harmful noise. This hearing protector is easy to wear, with a low profile, soft liquid sealing rings and no protruding parts that can catch. The wide, foam-filled ear cushions ensure that the set doesn't squeeze uncomfortably, and there is still plenty of space for the ears inside the shells. At just 175g, they are lightweight as well.
