Overview

The ProGARM 8210 Baselayer Top is a must-have garment for workers in high-risk industries. It has been designed to meet the rigorous safety standards required when working in environments such as utilities, electrical and power generation. With an Arc Rating of 3.6 cal it provides an additional layer of protection against arc flash incidents. Conforms to BS EN 1149-5:2018 and EN ISO 11612:2015.

The 8210 Baselayer Top is made from ProGARM's VXS+ Inherent Jersey fabric (220gsm). This soft, comfortable material is both protective and comfortable to wear. To be worn as an extra layer of protection as part of a complete Arc Flash clothing solution, it can be layered underneath polo shirts, sweatshirts and coveralls.
