Overview

Specification

The Polyco 9010 Hot Glove is a double layered cotton glove with a patterned nitrile grip coating. The glove is tested to Level 2 (up to 250°C) for contact heat, according to EN407. The glove is made from double-layered cotton for improved protection and durability. It has an ambidextrous design and a generous fit, so the gloves can be worn on either hand. The nitrile grip pattern provide superb grip for safe handling.
