Overview

Specification

The GL9822 Cryogenic Extreme Cold Protection Gauntlets provide exceptional protection for cold down to as low as -197°C. This makes them suitable for handling dry ice, cryogenic handling and liquefied gas transportation.

The gauntlets have a waterproof hydrophilic microporous membrane and have a glove thumb and index finger reinforcement in 1mm thick cowhide, fire-resistant leather. The gloves are lined with wool fleece and have a hydrophilic, microporous insert. Tested and certified to EN 388:1994 and EN 511:2006 European standards. Available in a range of sizes.
